-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Response to Amendment***

1. This office action is in response to the amendment filed on 3 August 2005.

### ***Response to Arguments***

2. Applicant's arguments regarding Claim 1, filed 3 August 2005 have been fully considered but they are not persuasive. Applicant argues that Melo et al fails to disclose a user interface configured to accommodate a user-selection of a subset of printers of the set of printers. Col. 2, lines 54-67, states that the user may issue a request to have a document printed on a printer. Such a request initiates the printer driver to create a print job to be transmitted to one or more of the printers 210,220, and 260. Furthermore, the applicant argues that Melo et al fail to disclose printing plural print jobs. Col. 3, lines 3-7, states separate print jobs 230 and 270 are transmitted.

### ***Allowable Subject Matter***

3. Claims 7, 9, and 11-21 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: Claims 7, 13, and 19 of the current application teaches similar subject matter as the prior art of Melo et al. (US 6,431,772). However claims 7, 13, and 19 are allowed for the reasons pointed out by Applicant's remarks (page 9, 1<sup>st</sup> paragraph).
5. Claims 9, 11, 12, 14-18, 20, and 21 are allowable for being dependent on an allowable base claim.

Art Unit: 2626

6. Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

***Claim Rejections - 35 USC § 102***

7. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

8. Claims 1 and 4-6 are rejected under 35 U.S.C. 102(e) as being anticipated by Melo et al. (US 6,431,772).

9. Regarding Claim 1, Melo et al disclose a computer-implemented printing system comprising: a set of printers configured to print user-selected print jobs (printers 210, 220, and 260); a communications link (public data communication network 250); and a processor linked via the communications link to the set of printers (computer 200), the processor having a user interface configured to accommodate user-selection of a subset of printers of the set of printers (button with a pointer device in a graphical user interface), the processor further configured to communicate plural print jobs to the subset of printers upon a single command (separate print jobs 230 and 270 are transmitted) (col. 2, lines 25-67, col. 3, lines 1-6).

Art Unit: 2626

10. Regarding Claim 4, Melo et al disclose a system, wherein the communications link is the Internet (public data communications network 250, such as the Internet) (col. 2, lines 25-36).

11. Regarding Claim 5, Melo et al disclose a system, wherein at least one of the printers in the sub-set of printers is in a remote location from the processor (remote printer 260) (col. 2, lines 25-36).

12. Regarding Claim 6, Melo et al disclose a system, wherein the sub-set of printers is a single printer (either of local printers 210-220, or the remote printer) (col. 2, lines 51-54).

### ***Conclusion***

13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
